Guidelines for Mini project Report

➢ The project documentation should include the following sections and information:

1. Cover Page

This page includes the project title, course name and id, student name with index number, lecturer name and submission date (Template is given in the third Page).

2. Table of Content
3. Table of Figures

4. Introduction

The introduction may contain the information about your selected E-Commerce web site site, literature survey, approaches and summary of the report.

5. Methodology

This section explains in detail the execution of the program from an end-user's point of view. The descriptions of the algorithms, data structures, implementation, etc. ==should not be included.== This section covers what types of inputs will be supplied to the program by the user, what are the outputs of the program, what is the functionality of the program, the descriptions of menu options and different parts of the program, etc. This section can be thought as the core of the "user manual" of the program. It is good practice to include screen outputs and some figures (e.g. expressing the structure and parts of the system). Do not give all the explanations in a single section; instead, divide this section into subsections for ease of reading.

6. Technologies that used

This section describe the Lanuages that use to implement the project, IDEs , Plugins etc.

7. Examples

It will facilitate understanding the document if some examples regarding the execution are included. You can include the Screen shots of your web site.

8. Improvements and Extensions

In this section, the parts of the program that need improvement and some possible future extensions are discussed. The weak and strong points of the program can be identified. Any shortcomings or defects of the program can be stated.

9. References

The references referred to within the document, if any, should be listed in this section in an IEEE format.

10. Appendices

Program source code must be included as an appendix. Also, if necessary, some information can be given inside appendices.

➤ The cover page template is given in page number 03. Follow that format. Except the cover page insert the page numbers, section numbers and figures numbers.

➤ Submit your report softcopy in pdf format.

MINI PROJECT

Course Name
Course Code

Index number : Student Name

Lecturer : Ms. G.N. Upeksha

Date : XX /08 / 2021
